

Extruded glazed ceramic elements

Ceramic fixing bracket

Aluminium sub-structure profile on unit

Heat coefficient value of aluminium: $237 \text{ W/m}^2\text{K}$ thus a layer of insulation is definitely needed

Aluminium insulated unit

Fixed double glazing

Heat coefficient value: $0.7 \text{ W/m}^2\text{K}$

The wide windows allows natural sunlight to enter the building making it beneficial for a working space.

Inclined interior bulkhead
